

For Immediate Release

**Adacel Continues to build on its International Leadership
With a Contract Win at the PCA in the Kingdom of Saudi Arabia**

Montreal, Canada (April 27, 2005) – Adacel, the leading developer of simulation, voice recognition, operational air traffic management and software solutions for civil and military aviation, in partnership with Nour Communications Co., a Saudi Arabia company that specializes in providing turn-key solutions for both the commercial and government sector, announced today that the PCA (Presidency of Civil Aviation) of the Kingdom of Saudi Arabia, has chosen the Adacel MaxSim Tower/Radar air traffic control (ATC) simulator for its growing aviation faculty in Jeddah.

Built on COTS hardware, MaxSim is a proven, robust and reliable control tower and radar simulator for both civil and defense environments. MaxSim provides speaker independent voice recognition, high fidelity 3D visuals, comprehensive weather effects and environmental sound effects to greatly enhance ATC training, thereby contributing to a fully immersive training and research environment.

“Adacel is extremely pleased with the fact that PCA has selected our MaxSim simulator to increase its training capabilities,” said Fred Sheldon, Adacel’s CEO for North America. “We are honored to be an integral part of the PCA’s simulation and training infrastructure and look forward to a close and long term relationship.”

About Adacel
