For Immediate Release

Adacel Awarded Mississippi Army National Guard Tower Simulator Contract

Orlando, FL (November 7, 2007) – Adacel, an industry leader in software integration, simulation development, and voice recognition technology, announced today it has received an order from the Mississippi Army National Guard to deliver a MaxSim® air traffic control tower simulator to 232nd Airfield Operations Battalion Southhaven, MS.

Under terms of the agreement, Adacel will provide a 180˚ MaxSim® tower simulator with voice recognition technology, a 3D visual database, and the latest functional capability in use by the United States Army, Air Force, Marine Corps and Federal Aviation Administration.

The 232nd AOB, located in Southaven MS, is one of 5 five units that makeup the 204th Theater Airfield Operations Group Headquartered in Esler Field, LA. The soldiers of the 232nd provide Combat Support and Air Traffic Control Services in Theaters of Operation around the world. The MaxSim® simulator will be used for pre-deployment readiness and training to ensure soldiers are prepared to serve anywhere in the world at a moments notice.

"The Mississippi Army National Guard is a notable addition to Team Adacel along with the Marines, Army, and Air Force and we are very pleased to welcome them. Integrating the National Guard centric data with our MaxSim® software will provide a return on investment to the entities providing national defense, as well as place the National Guard firmly at the cutting edge of air traffic control (ATC) training technology with the rest of the Department of Defense," stated Fred Sheldon, Adacel’s CEO. "Team Adacel has demonstrated its ability to create a comprehensive training and development solution to support the warfighter and once again has earned its place as the simulator of choice by air traffic controllers."

Over the last six years, Adacel has earned the unquestioned reputation as the premier provider of air traffic control tower training simulators by winning key civil and military contracts. Adacel is the supplier for ATC tower simulation systems for the United States Air Force, United States Army, the United States Navy, the United States Marine Corps, and the Federal Aviation Administration, as well as Civil Aviation Authorities in Australia, Europe and the Middle East, and many of the most prestigious aviation universities in the world.

About The Adacel MaxSim™ Simulator

The Adacel MaxSim® simulator products represent the benchmark air traffic control training suite. They have been selected by U.S. military and commercial aviation authorities, as well as over thirty air traffic management services around the world. MaxSim® Tower and MaxSim® Radar meet the pressing training requirements of the ATC community. Capable of integrated tower and radar operations, they have the flexibility to be operated in standalone configurations, or in multiple integrated configurations. MaxSim® products provide the functions and features to address many areas, including: traffic flow studies, effective and efficient training of aviation personnel, airport sighting studies, gate-to-gate management, development of new airspace and
airport management, techniques and procedures, disaster management planning and airport and aviation security studies.

**About Adacel**
Adacel is a global software technology and systems integration leader. The company is a leading developer of critical security, aviation (air traffic management), speech recognition, and defense simulation and security systems for government and business entities. Multi-year support is available on all simulators as well as full-time, on site maintenance and operation of the systems. Adacel’s products can be found in more than 30 countries. With a stringent commitment to customer support and extensive research and development, Adacel is recognized as a leader in simulation system integration and software development. Adacel was established in 1987 and listed on the ASX in 1998 (ASX: ADA). The Company’s U.S. operations area headquartered in the I-4 Technology Corridor of Orlando, Florida. Adacel has offices in Washington, D.C., Montreal Canada, Melbourne, Australia and Manchester, United Kingdom.
