

For Immediate Release

Adacel Enjoys Successful WATMC 2018

Orlando, Florida, March 22, 2018 – Adacel Systems Inc. (Adacel or the Company) reported that their participation at the 2018 World Air Traffic Management Conference (WATMC) held 6-8 March in Madrid, Spain generated significant new interest in Adacel's wide range of aviation and aerospace products and solutions. The event has grown steadily since its start in 2013, attracting key ATM decision-makers from around the world to explore solutions to the latest challenges in ATM. Adacel has showcased their products at WATMC every year since its inauguration and described this occasion as the best yet.

Adacel featured their MaxSim Air Traffic Control (ATC) Tower simulator on a huge 200 inch projection screen along with demonstrations of a variety of their innovative training systems. Visitors to the Adacel booth were captivated by some augmented reality applications developed by Adacel specifically for the event. The true star of the show for Adacel was the Company's Aurora Air Traffic Management (ATM) platform, which is a highly advanced global ATM automation system.

Adacel's booth staff commented on the notably higher volume of foot traffic at this year's event and were particularly impressed by the intense interest in their Aurora ATM automation systems. The Company credits this to an evolving ATM marketplace that is shifting focus from ground based systems to space based technologies and automation applications that offer financially attractive solutions for many organizations, while providing the means to safely expand air traffic capacities. Adacel's Aurora system is an excellent fit because it can manage all types of airspace and is scalable to meet present and future requirements, while incorporating the latest in CNS/ATM technologies.

"I am very pleased with our experience at WATMC this year", said Gary Pearson, Adacel's CEO. "This event has proven again to be a very worthwhile opportunity to meet with our existing clients as well as those seeking new solutions. The quality of the leads generated at the show is very encouraging for our future business."

The WATMC combines a large-scale exhibition and world-class conference to showcase the latest trends and developments in air traffic management. As such WATMC provides an ideal venue for Adacel to exhibit the advanced capabilities of their ATM automation software and their ATC training devices. Adacel plans to expand their presence at WATMC in 2019.
